

# HMC MIST COLLECTOR SYSTEM

The CECO HMC Mist Collector System is designed to eliminate mist emissions in a wide range of applications and industries. Emissions from one source or various sources can be directed to one HMC System. This system can be designed for specific applications that demand special configurations or special materials of construction.

- Long filter life - Up to 10 years !
- Low operating / maintenance costs
- Cleaned air can go back into plant
- Efficiencies approaching 100 % for particles > 3 micron
- Small filters – Handled easily
- Efficiencies of 99.5 % or higher for particles < 3 micron
- Side access – Overhead clearance not required

## HMC Mist Collector

## Typical Applications

- Automotive / Machinery: Metalworking Fluids
- Food Processing: Fryer Lines
- Asphalt: Storage Tanks, Coaters, and Saturators
- Textiles: Blue Haze Emissions
- Plastics: Plasticizer Emissions
- Steel / Metals: Rolling Mill Emissions

*Creating better working environments for you.*

## HMC Mist Collector Specifications

Model	Flow (ACFM)	Length	Width	Height	Main Filter Qty
HMC-1000	1000	81	32	46	4
HMC-2000	2000	98	47	47	9
HMC-3000	3000	105	62	48	12
HMC-4000	4000	125	62	50	16

Note: All dimensions in inches. Dimensions subject to change without notice.

## Options

- HEPA Filter
- Motor starter and controls
- Custom designs / dimensions available
- Turnkey systems

## More Solutions from CECO Filters.....

Scrubber Systems

- Acid Gas Scrubbing
- Particulate Control

Dust Collector Systems

- Fabric Filter Dust Collectors
- Cartridge Dust Collectors

Mist Collectors

- Acid and Caustic Mist Control
- Product Recovery
