

GMD TOTALLY ENCLOSED TREATMENT SYSTEM (TETS™) FOR ACID GAS

GMD's TOTALLY ENCLOSED TREATMENT SYSTEM (TETS™) uses dry reactant(s) to react with acid gas constituents in the exhaust systems from industrial processes. GMD's TETS™ is designed, tested and proven to deliver GUARANTEED effectiveness for the harshest applications. The GMD POWDER INDUCTOR NOZZLE (PIN) thoroughly mixes the reactant powder(s) with the acid gas constituents in the exhaust, assuring maximum chemical reaction.

*In some cases two separate Reactants may be used and a second Powder Feeder is added.

Single Source Responsibility

GMD's services are not limited to equipment supply. We can provide you with 'Total' services, providing single source responsibility for the design, fabrication, erection, and start-up of your entire system. This ensures the most economical system, completed within budget and in a timely manner.

Features

- Completely Dry Operation
- Precise Control of Powder Feed
- Treatment Efficiencies to 95%
- Minimal Moving Parts
- Enhanced Baghouse Efficiencies
- Low Maintenance
- Effective For -
 - Hydrogen Chloride (HCl)
 - Hydrogen Fluoride (HF)
 - Sulphur Dioxide (SO₂)

Options

- Custom Designs For Specific Applications
- Hopper Heaters
- Hopper Vibrators
- Powder Heaters
- Live Bin Bottoms
- Bin Level Controls
- Bulk Storage Silo
- Automatic Variable Feed Controls

Your Total Pollution Control And Clean Air Engineering Source
