

CECO MIST COLLECTOR (CMC) SYSTEM

The CECO Mist Collector (CMC) System is designed to eliminate mist emissions in a wide range of applications and industries. Emissions from one source or various sources can be directed to one central CMC System. This system can be designed for specific applications that demand special configurations or special materials of construction.

- Long filter life - Up to 10 years!
- Cleaned air can be returned to plant
- Exhaust ductwork from multiple areas can go to single CMC unit
- Small filters – Can be handled by hand
- Side access – No overhead clearance needed
- Low operating costs
- Low maintenance requirements
- Efficiencies approaching 100% for particles > 3 micron
- Efficiencies of 99.5% or higher for particles < 3 micron

CECO Mist Collector (CMC)

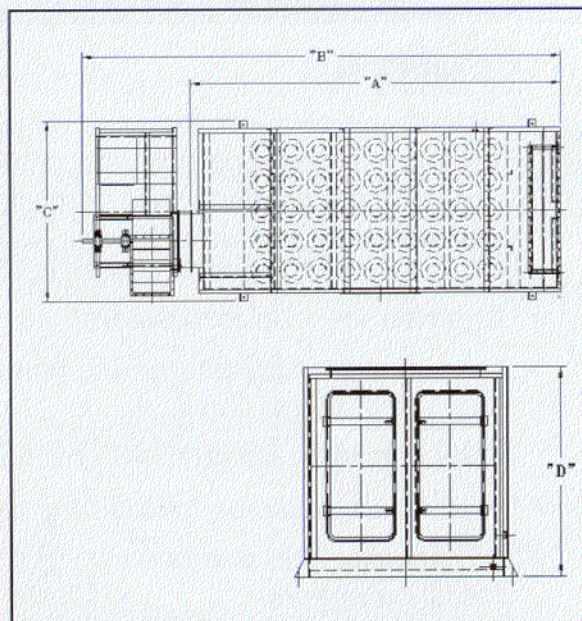

Industries and Typical Applications

- Automotive / Machinery: Metalworking Fluids
- Asphalt: Storage Tanks, Coaters, and Saturators
- Plastics: Plasticizer Emissions
- Food Processing: Fryer Lines
- Textiles: Blue Haze Emissions
- Steel / Metals: Rolling Mill Emissions

CECO Mist Collector (CMC) Specifications

Model Number	Flow (ACFM)	Dimensions			
		(A) Length (w/o Blower)	(B) Length (w/ Blower)	(C) Width	(D) Height
CMC-2400	2,400	82	127	63	81
CMC-3200	3,200	100	153	63	81
CMC-4000	4,000	121	174	63	83
CMC-5300	5,300	117	175	78	83
CMC-6400	6,400	134	192	78	83
CMC-7400	7,400	150	208	78	85
CMC-9300	9,300	148	209	93	85
CMC-10600	10,600	168	221	93	85
CMC-11900	11,900	184	237	93	87
CMC-14300	14,300	188	245	108	87
CMC-15900	15,900	209	270	108	87
CMC-17500	17,500	226	287	108	87
CMC-19100	19,100	207	268	123	87
CMC-22300	22,300	240	307	123	90
CMC-24100	24,100	260	332	123	92
CMC-26000	26,000	277	349	123	96
CMC-27800	27,800	293	365	123	98
CMC-36000	36,000	335	411	138	104

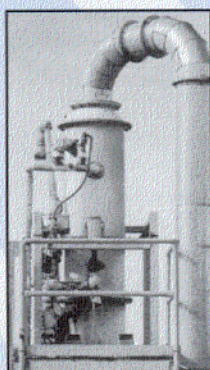

NOTE: All dimensions in inches. Contact CECO for CMC unit dimensions without pre-filters.

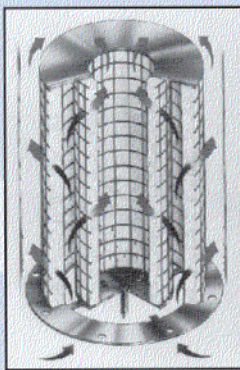

Options

- Blower and silencer
- Motor starter and controls
- Custom designs/dimensions available
- Turnkey installation
