

Dissolved Gas Flotation System

PROJECT: PTTEP LKU F & Closed Drain Facilities

CLIENT: E Square Environment & Engineering

LOCATION: Thailand

APPLICATION: Produced and Drain Water Treatment

PACKAGE: CECO Peerless PQC Dissolved Gas Flotation

FLOW: 400 m³/hr

PERFORMANCE GUARANTEE:

Total (free) Oil: 250 inlet to <15 ppm

Total Suspended Solids: 100 inlet to <10 ppm

“Dissolved Gas Flotation is the latest innovation in flotation technology. Advanced pump technology produces a dense formation of microbubbles, enhancing separation over traditional methods. Enhanced separation means increased oil recovery, more money for the operator, and cleaner, more environmentally friendly water for disposal.”
