

RTO OXIDIZERS FOR COST EFFECTIVE VOC ABATEMENT

For Petroleum, Chemical, Pharma, Midstream Gas & Bioenergy

The CECO Environmental Family has designed and installed over 1,200 RTO Thermal and Catalytic Oxidizers and VOC Concentrator Systems since 1987 for cost effective VOC compliance from 1,000 to over 130,000 scfm with single modular RTO systems. Our Adwest Technologies and CECO Environmental brands have extensively installed RTO systems for a wide range of difficult petroleum, gas processing, pharma and petrochemical applications including:

- · Chemical processing
- Midstream gas processing
- Amine treating & dehydrating
- Hydraulic fracturing resin proppant
- Petrochemical & hydrocarbon processing
- Acid gas & halogenated processes
- Bioenergy & ethanol processing
- · Distilling, flavors & fragrances
- · Pharmaceutical & biopharma
- Asphalt roofing & saturating
- · Chemical & metals recycling
- · Biogas, wood pellet & landfill off gas

Contact us today for a confidential proposal on how we can make your VOC and air compliance program more cost effective with single source technology integration of RTO Thermal oxidizers, Acid Gas Scrubbers, VOC Concentrators, filter systems and turnkey design and supply of process duct, stacks and controls.

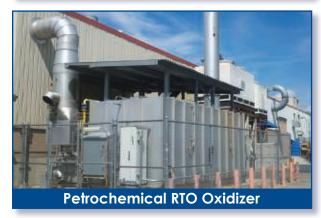

FLAMELESS NOx-FREE RETOX RTO COMBUSTION
