

THE RESULTS:

- a. Ensured Demineralization quality
- b. Compact Packages to fit within the limited footprint available

ENVIRONMENTAL BENEFITS:

- a. CECO Peerless used Reverse osmosis technology since it is one of the greenest solutions to treat contaminated water.
- b. CECO Peerless used Electro-deionization technology since it is the only Demineralization technology that does not need any operational chemical.

“CECO Peerless study all the available information to understand the customer concerns, by selecting the right technologies and optimizing the design using special design projections. CECO managed to create the most optimized, efficient & competitive solution to meet our customers' requirements.”
