

### Description:

Burgess-Aarding centrifugal type water separator/silencers are designed to remove entrained liquid from air in a vacuum system while providing noise reduction.

### Features:

- 99% efficient extraction of free liquid
- Up to 40 dB noise reduction
- Economically priced
- Long service life

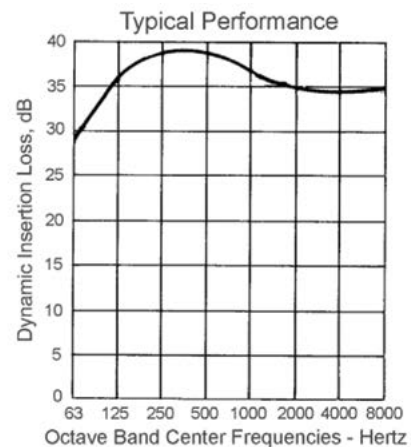

### Theory of Operation:

The Burgess-Aarding patented design removes liquid and prevents noise instead of muffling it. Gas flow passes through a ported tube and snubbing chamber which attenuates the noise over a wide frequency range. Simultaneously, 99% of the free liquid is removed centrifugally in the separation section.

### Specifications:

<b>Extraction Efficiency:</b>	99% of Free Liquid
<b>Noise Reduction:</b>	Up to 40 dB
<b>Maximum Operating Pressure:</b>	10 psig
<b>Typical Sizes:</b>	1" - 16" Larger Sizes Available Upon Request
<b>Standard End Connections:</b>	NPT or 125# ANSI Flanged
<b>Standard Material of Construction:</b>	Carbon Steel Other Materials Available Upon Request
<b>Finish:</b>	Prime Coated Exterior

Burgess-Aarding model WSDA water separator

# MODEL WSDA - Discharge Water Separator/Silencer

**WSDA**  
Sizes 1" Thru 3"

**WSDA**  
Sizes 3 1/2" and larger

Catalog Number	Dimensions in Inches							Estimated Weight in lbs.
